**VERIFIER CAPITAL ACQUIRES SRP SECURITY SYSTEMS**

London, UK – 5 May, 2008 – SRP Security Systems Limited, a Bucks-based service and installation firm, has been acquired by Verifier Capital Limited.

The acquisition further expands Verifier's investment in the UK alarm market through the targeted selection of long-standing, local security providers with a loyal customer base and strong brands recognized for personal service. SRP's presence in the fast-growing Bucks and Heathrow area allows Verifier to continue to expand its geographic focus of security providers in West and Southwest London.

"SRP Security complements our portfolio with yet another local, recognized brand whose expertise and responsive goes above and beyond their NSI Gold approval. Verifier Capital is pleased to support and invest in the current management team, as they leverage Verifier's financial support to grow SRP's sales and engineering capability," said Chris Antonio, Verifier Capital's Managing Director.

"Retirement planning opportunities combined with transitioning long-standing security providers to the next generation of management continue to be our most sought-after products in the UK market. Our flexibility and industry experience allow us to structure transactions which have no equal to those offered by banks and the large industrials."

SRP, with 25 years trading history, provides premier security installation and integrated systems services to commercial and residential customers between Slough and London, and will continue to operate from its current offices in High Wycombe, Bucks.
